Education

Autumn 2015	Exchange semester , <i>Ecole Polytechnique Federale de Lausanne</i> Switzerland Department of Computer Science
Since 2014	Master's program in Computer Science, <i>University of Salzburg</i> Austria Department of Computer Science Expected graduation: 2016
2014 2011	B.Eng. , <i>University of Salzburg</i> Austria Department of Computer Science
Supervisor	Prof. Christoph Kirsch
2009 2004	Diploma thesis , (<i>Technical</i>) <i>high school</i> Braunau am Inn, Austria My diploma thesis was done in cooperation with Sony (DADC) Austria. The topic of my thesis is developing software for analyzing and filtering large volume of email traffic sent to customer support. I developed the so-called SEER (Sophisticated Embedded Email Responder) for this purpose with another student.
Major	Design and communication technologies

Employment

Sep 2011	DVT-Daten-Verarbeitung-Tirol GmbH Austria
May 2010	<i>Software Engineer</i> I designed and implemented web applications based on a J2EE architecture and the Apache Struts 2.0 framework.

Experience

Jan 2015	pseudOS, Advanced Operating Systems Class University of Salzburg, Austria
Oct 2014	<i>Student</i> The aim is to develop the major components of an operating system based on Pintos. I have developed a more efficient scheduling algorithm, user-programs, virtual memory, and a UNIX like filesystem. My operating system is called pseudOS.

Aug 2014 Aug 2013	ACDC4JS, Research Group of Professor Christoph Kirsch University of Salzburg, Austria <i>Project Staff</i> The project is done in cooperation with Google Munich. The purpose of ACDC4JS is to analyze the efficiency of the garbage collector in JavaScript virtual machines, especially Google's V8. I have worked on research and development of measurement tools. The analyses of heap models, using automated user interactions was also part of my work.
June 2013 March 2013	PCCC, Compiler Construction Class University of Salzburg, Austria <i>Student</i> The goal is to develop a self-compiling compiler. I have developed a full functionally compiler in a non-trivial subset of C together with another student. Target is a DLX-based emulator. My self-compiling compiler is called PCCC and was the best project of the class.
Sep 2012 Aug 2012	SIGMATEK GmbH & Co KG Austria <i>Summer Intern</i> I developed a Wireshark plugin for the Nested Varan Frames protocol. I extended an existing NSIS installer. Used programming languages were C and C++.
Aug 2008 July 2008	ppedv AG Germany <i>Summer Intern</i> I implemented new features and a new design for the homepage, blog-engine and forum of the company using .Net technologies.

Awards

- 2009** **Innovation & Wirtschaft in OÖ** OÖ. Technologie- und Marketinggesellschaft m.b.H
With the SEER project I won the first price in the category IT with my college. A competition for innovative high school students, supported by the government of Upper Austria.
